ABSTRACT

This document features detailed statistical tables of Academic Research and Development Expenditures for fiscal year 1999. The data presented in this report were collected from the National Science Foundation's (NSF's) fiscal year 1999 Survey of Research and Development Expenditures at Universities and Colleges. Contents include: (1) "Technical Notes"; (2) "Detailed Statistical Tables"; (3) "University-Administered Federally Funded Research and Development Centers: FY 1999"; and (4) "Survey Instruments." (YDS)

DIVISION OF SCIENCE RESOURCES STUDIES

The Division of Science Resources Studies (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

ACKNOWLEDGMENTS

The preparation of *Academic Research and Development Expenditures: Fiscal Year 1999*, Detailed Statistical Tables, was managed by M. Marge Machen, Project Officer, National Science Foundation (NSF), Division of Science Resources Studies (SRS), Research and Development Statistics Program (RDS), under the overall direction of John E. Jankowski, Program Director, (RDS). Guidance and review were provided by Lynda T. Carlson, Division Director, Mary J. Frase, Deputy Division Director, and Ron Fecso, Chief Math-

ematical Statistician, SRS. Julia H. Harriston and Tanya R. Gore of SRS provided copyediting, processing, and final composition for this report. Quantum Research Corp. (QRC) of Bethesda, MD, under NSF contract number SRS-96-19737, prepared the tables, general and technical notes, and report copy. QRC staff members who worked on this report were Heidi L. Clark, Sujata Gamage, Jennifer Greer, Gail H. Henry, Cheryl Lloyd, Elizabeth H. Peto, and Emily Wueker.

GENERAL NOTES

The data presented in this report were compiled from the National Science Foundation's (NSF's) fiscal year (FY) 1999 Survey of Research and Development Expenditures at Universities and Colleges (academic R&D expenditures survey). They refer to science and engineering expenditures for separately budgeted research and development (R&D). Terms used in institutional accounting procedures are incorporated throughout the tables.

The term "separately budgeted R&D expenditures" includes all funds expended for activities specifically organized to produce research outcomes and commissioned by an agency either external to the institution or separately budgeted by an organizational unit within the institution. "Expenditures" are funds actually spent by an institution during its fiscal year. "Separately budgeted R&D equipment purchased from current funds" includes all research equipment purchased under sponsored research project awards.

"Federally funded research and development centers" (FFRDCs) are R&D-performing organizations that range from the traditional contractor-owned/contractor-operated or Government-owned/contractor-operated organizational structures to various degrees of contractor/Government control and ownership. FFRDCs are formed to achieve particular Federal R&D objectives that cannot be met as effectively by existing organizations.

The terms "imputation" and "imputed data" refer to the computerized process by which NSF develops

estimates of data when institutions do not furnish the information upon request. Using this process, estimates are developed that are based primarily on key data items reported in prior years' surveys. When these key data items are not available, estimates are based on figures derived from data of respondent institutions that have similar characteristics, including highest degree granted and type of institutional control (public or private). In this publication, the letter "i" is used to identify imputed data and the letter "e" is used when institutional respondents indicated that their data were estimated, or when data required slight mathematical adjustments.

Data presented in trend tables are assembled from the most recently completed survey cycle. Since prior years' data are reviewed for consistency with current year responses and, when necessary, are revised in consultation with institutional respondents, references to prior years' data should be restricted to this document.

Requests for additional information concerning the survey findings for the current or prior surveys should be directed to M. Marge Machen at—

SECTION A.
TECHNICAL NOTES

SCOPE OF THE SURVEY

Data for the National Science Foundation's (NSF's) fiscal year (FY) 1999 report on research and development (R&D) expenditures were collected from 597 institutions of higher education in the United States and Outlying Areas. These institutions have doctoral programs in science and engineering (S&E), are historically black colleges or universities (HBCUs) that expend any amount of separately budgeted R&D in S&E, or are master's or bachelor's degree-granting institutions that expend at least \$150,000 in separately budgeted R&D in S&E.

In addition, the survey includes 17 federally funded research and development centers (FFRDCs). To qualify, an FFRDC must be engaged in basic or applied research, development, or management of R&D activities, and the results of these activities must be directly monitored by the Federal Government—usually a single agency—in a relationship expected to be maintained on a long-term basis. The center must be operated, managed, and administered by either a university or consortium of universities as an autonomous organization or as an identifiable separate operating unit of its parent institution. Finally, 70 percent or more of the center's financial support must be received from the Federal Government.

Although the same survey form (NSF Form 411) is used to collect data from both academic institutions and FFRDCs, the resulting data are presented separately in this report. The survey population was reviewed prior to mailing the questionnaires to ensure that each institutional classification was accurate. Characteristics of the schools were reviewed before and during the course of the survey to determine if changes had occurred (i.e., in highest degree granted or in terms of school openings, closings, or mergers).

FY 1999 SURVEY FRAME DESIGN

Starting with the FY 1998 survey, NSF has conducted a full population survey each year. NSF also has conducted a population review each year to ensure that all institutions that meet the inclusion criteria are, in fact, surveyed. This review is based on the survey frame design developed in FY 1998:

- Only S&E bachelor's and higher degree-granting institutions are surveyed.
- All S&E doctorate-granting institutions and all HBCUs are surveyed.

- All S&E master's and bachelor's degree-granting institutions that reported at least \$150,000 in separately budgeted R&D expenditures in S&E in the previous fiscal year are surveyed. NSF contacted the master's and bachelor degree-granting institutions that were not in the FYs 1994 through 1998 academic R&D expenditures populations to determine if they met the \$150,000 expenditure criteria. Institutions with a minimum of \$150,000 were retained in the survey population. This represents a change from previous academic R&D expenditures surveys, which used a minimum of \$50,000 as the eligibility threshold.

In FY 1999, NSF conducted a population review using the above criteria. As a result of adding and deleting institutions from the survey population to comply with the inclusion criteria, the overall number of institutions surveyed increased from 556 in FY 1998 to 597 in FY 1999.

SURVEY INSTRUMENT

Most major R&D performers have incorporated into their record-keeping systems the data that are essential to complete this survey, thereby ensuring a consistent format from one year to the next. Such consistency yields the most useful statistics for time series. As a rule, information to complete this questionnaire is found within the institutions' year-end accounting records.

The survey questionnaire consists of four main items:

Item 1 is a request that institutions report their total current expenditures for separately budgeted science and engineering R&D for all activities specifically organized to produce research outcomes and commissioned by an agency either external to the institution or separately budgeted by an organizational unit, i.e., research centers, within the institution by source of funds. In addition, schools are asked to provide the percentage of the total and the percentage of the federally financed expenditures that are considered basic research. Included also are research funds for which an outside organization, educational or other, is a subrecipient. Care should be observed when interpreting data on source of funds; for example, industry R&D support is limited to grants and contracts for R&D activities from profit-making organizations. Total industry funds excludes research funded through unrestricted accounts and from corporate foundations, endowments, and fellowships to students; those funds would be included in

an institution's own funding totals. An increasing number of institutions have linkages with industry and foundations via subcontracts, thus complicating the identification of funding source. In addition, institutional policy may determine whether unrestricted state support is reported as state or as institutional funding.

Item 1A, added in FY 1996, is a request for total and federally financed current fund expenditures for separately budgeted science and engineering R&D passed through the institution to subrecipients¹. Schools are asked to break out the subrecipient category by "educational" and "other."

Item 2 is a request for total and federally financed current fund expenditures for separately budgeted R&D activities by detailed S&E fields. Major fields remain unchanged from previous years. In the FY 1997 questionnaire, a subfield of bioengineering/biomedical engineering was added under Engineering. When interpreting these data at the detailed discipline level, users should keep in mind that there is considerable interdisciplinary and multidisciplinary activity.

Item 3 is a request for the portions of total and federally financed expenditures reported in items 1 and 2 that were used for the purchase of research equipment out of current funds. This portion includes all research equipment purchased under sponsored research project awards and disbursed in the same detailed disciplines

as in item 2. These data are of special interest to Federal and institutional policy-makers in determining current funding levels for scientific research instrumentation.

ITEM 1A ANALYSIS

Because the responses to this item were not published in any of the Detailed Statistical Tables in FYs 1996 and 1997, the technical notes for these publications included summary tables. For FY 1999, as was done for FY 1998, in addition to the following summary and tables, NSF is including two ranking tables in the Section A tables based on item 1A data.

This item was completed by 87.5 percent of the respondents. The total R&D expenditures passed through to subrecipients, \$1.3 billion, represented 5.7 percent of the item 1A respondents' total R&D expenditures and 4.6 percent of all separately budgeted R&D in FY 1999 (table 1). The doctorate-granting institutions reported a similar percentage of pass-through funds as the non-doctorate-granting institutions. Item 1A respondents from doctorate-granting institutions reported \$1.2 billion, or 5.7 percent, of their total R&D expenditures were passed through to subrecipients, versus \$17 million or 5.4 percent of item 1A non-doctorate-granting respondents. Item 1A respondents from private institutions reported a higher percentage (6.4 percent) of pass-through funds than those from public institutions (5.2 percent).

Table 1. FY 1999 item 1A summary of total academic R&D expenditures

Degree and control	[In thousands of dollars]				
	All respondents' total R&D ¹	Item 1A ² respondents' total R&D	Total R&D expenditures passed to subrecipients		
			Educational	Other	Total ³
All academic institutions.....	27,365,379	22,152,694	572,083	424,357	1,253,111
Doctorate.....	26,923,485	21,827,952	564,858	420,515	1,235,633
Non-doctorate.....	441,894	324,742	7,225	3,842	17,478
Public.....	18,514,284	13,950,668	372,745	264,626	730,652
Private.....	8,851,095	8,202,026	199,338	159,731	522,459

¹ This total is the amount reported by all respondents prior to imputation for non-respondents.

² This total is the amount reported by respondents who answered item 1A. Item 1A measures the amount of R&D expenditures passed through the institution to subrecipients.

³ Detail may not sum to totals due to rounding and because some institutions provided only total and Federal R&D expenditure data passed subrecipients.

¹ Subrecipient means the entity that expends awards from a pass-through entity to carry out a program, but does not include an individual that is a beneficiary of such a program.

Respondents to this question reported \$1 billion in Federal R&D funds passed through to subrecipients. This amount represented 7.9 percent of the Federal support reported by item 1A respondents and 6.4 percent of the \$16 billion in total Federal support (table 2).

Table A-6 shows the total amount of R&D expenditures passed through to subrecipients for the 100 institutions reporting the highest amounts. Table A-7 shows the total amount of Federal R&D expenditures passed through to subrecipients for the 100 institutions reporting the highest amounts. Attendees at a June 1999 workshop in Boulder, CO, recommended publishing these data in this report. Respondents who provided item 1A data were contacted to obtain their concurrence with the publication of these data at the institutional level.

RESPONSE RATE

The FY 1999 survey questionnaires were mailed in November 1999. Respondents could choose to submit a paper questionnaire or to use a Web data collection system to respond to the survey. Every effort was made to maintain close contact with respondents in order to preserve both consistency and continuity in the resultant data. Questionnaires were carefully examined for completeness upon receipt. Computerized facsimiles of the survey data were then prepared for each institution, comparing the current and 2 prior years' data and noting any substantive disparities. A personalized e-mail message was sent to the respondents so that they could

provide revisions before final processing and tabulation of the data. The e-mail message included a Web link to the academic R&D expenditures Web-based data collection system, allowing respondents to view and correct their data via the Web.

Respondents were asked to explain significant discrepancies between current and prior years' reporting patterns previously verified as correct (see Data Anomalies for more information). They were encouraged to correct prior years' data if anomalies were identified. When updated or amended figures covering past years were submitted, NSF correspondingly changed trend data. Similarly, if a respondent institution underwent an organizational change, such as a merger, NSF incorporated the effects of such changes into prior years' data.

By the survey closing date at the end of August 2000, forms had been received from 588 universities and colleges out of the academic population of 597, resulting in a 98-percent response rate. Responses were received from 99.4 percent of all doctorate-granting institutions, where 98.4 percent of the estimated national R&D expenditures in S&E fields was disbursed. Also, forms were received from all of the 17 FFRDCs. Table A-1 displays a detailed breakdown of the response rates by highest degree granted.

As in FY 1998, Oregon Health Sciences University did not respond to the survey in FY 1999. This institution was among the first 100 universities and colleges

Table 2. FY 1999 item 1A summary of Federal academic R&D expenditures

[In thousands of dollars]					
Degree and control	All respondents' Federal R&D ¹	Item 1A ² respondents' Federal R&D	Federal R&D expenditures passed to subrecipients		
			Educational	Other	Total ³
All academic institutions.....	15,965,069	12,986,506	501,638	317,297	1,027,029
Doctorate.....	15,706,289	12,776,257	494,777	313,678	1,011,507
Non-doctorate.....	258,780	210,249	6,861	3,619	15,522
Public.....	9,590,068	7,113,589	321,004	216,433	612,026
Private.....	6,375,001	5,872,917	180,634	100,864	415,003

¹ This total is the amount reported by all respondents prior to imputation for non-respondents.

² This total is the amount reported by respondents who answered item 1A. Item 1A measures the amount of R&D expenditures passed through the institution to subrecipients.

³ Detail may not sum to totals due to rounding and because some institutions provided only total and Federal R&D expenditure data passed through to subrecipients.

ranked by total R&D expenditures in FY 1997, and users should be aware that both the FY 1998 and the FY 1999 data for this institution were imputed.

NATIONAL TOTAL AND IMPUTATION

To provide a national estimate for all universities and colleges performing R&D in FY 1999, it was necessary to implement two statistical procedures. First, data were estimated by "imputation" for the nine institutions that had not responded by the closing date of the survey, using imputation techniques that have been used consistently since FY 1976. Second, data were also imputed for universities and colleges that submitted only partial responses. The imputed total was \$124 million, or 0.4 percent of the \$27.5 billion total R&D expenditures, as shown in Table A-2.

Tables A-3a and A-3b present breakdowns of the total and Federal imputed amounts by S&E fields. The dollar amount imputed is displayed along with the percentage it represents of the national estimate for universities and colleges in a particular field. The amount imputed is similarly broken down by source of funds in table A-4.

A number of surveyed institutions have responded only intermittently in past years, providing data one year, not responding for one or more subsequent years, and then providing data again. For the years in which no response was received, data have been imputed as previously described. Although the imputation algorithm accurately reflects national trends, it cannot account for specific trends at individual institutions. For this reason a separate backcasting of prior years' data was performed, following current-year imputation.

For each institution, formerly imputed key variables for items 1 to 3 were recomputed to ensure that the imputed data accurately represent the growth patterns shown by reported data. If data were reported for fiscal years 1996 and 1999 but not for the intervening years, for example, the difference between the reported figures for each item total was calculated and evenly distributed across the intervening years (1997-1998). The new figures were spread across disciplines (items 2 and 3) or sources of support (item 1) on the basis of the most recent reporting pattern. A clean facsimile was generated for each of the institutions undergoing these procedures and returned to the school for comment. These procedures result in much more consis-

tent reporting trends for individual institutions but have little effect upon aggregate figures reflecting national totals.

DATA ANOMALIES

Aggregate academic expenditure data are generally consistent from year to year, although data for individual institutions may vary considerably. Data anomalies may reflect true increases or decreases in expenditures or may be the result of changes in reporting methodology.

STATE TABLES

The Detailed Statistical Tables showing R&D expenditures at individual doctorate-granting institutions by state provide detailed campus listings for the University of Tennessee, the University of Colorado, and Louisiana State University in FY 1999. FY 1999 was the first year that Louisiana State University data were presented in this way.

HIGHEST-DEGREE-GRANTED TABLES

Several longitudinal tables display data for institutions whose highest S&E degree granted is at the doctoral level. In tables produced prior to FY 1992, it would have been difficult to identify whether changes in yearly R&D expenditures were caused by changes in expenditure levels or in the number of doctorate-granting institutions. In order to maintain a consistent group of institutions across all years, the highest-degree-granted status for each institution is based on the highest degree granted in the most recent year, FY 1999.

DATA AVAILABILITY

Data published in this report are also available in machine-readable form on the World Wide Web. Single-year or multi-year data files are available with data for FYs 1975 through 1999.

Information on file formats and the years for which they are available can be found on the World Wide Web at this URL: <http://www.nsf.gov/sbe/srs/rdexp99/rdpub99/99pubuse.htm>.

Selected data items for institutions are available on the World Wide Web at <http://www.nsf.gov/sbe/srs/profiles/start.htm>. The institutional profiles cover data from this survey as well as data collected in NSF's other

academic S&E surveys: the Survey of Graduate Students and Postdoctorates in Science and Engineering (graduate student survey) and the Survey of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions (Federal S&E support survey). The profiles are also linked to the corresponding ranking table of each survey.

Institutional researchers can obtain data from several academic S&E resources through the Web-Based Computer-Aided Science Policy Analysis and Research (WebCASPAR) database system, which is an easy-to-use tool for the retrieval and analysis of statistical data on academic S&E resources. WebCASPAR provides an extensive and growing data library with multi-year statistics on the state of higher education in general and on academic S&E resources specifically. This data library is based on a set of standard institutional and field-of-science definitions across the multiple sources used to develop the database. The WebCASPAR pro-

gram includes built-in help capabilities to facilitate the use and interpretation of the data.

The latest version of WebCASPAR can now be accessed via the Web at <http://caspar.nsf.gov/webcaspar>.

WebCASPAR data are drawn from a number of sources. All data are available for individual institutions, by state, and at the national level. Longitudinal data from surveys of universities and colleges conducted by the NSF Division of Science Resources Studies include the academic R&D expenditures survey, the Federal S&E support survey, and the graduate student survey. Data from the surveys of universities and colleges conducted by the National Center for Education Statistics include earned degrees, opening fall enrollment, tuition, faculty salaries, tenure and fringe benefits, and financial statistics.

SECTION B.

DETAILED STATISTICAL TABLES

Note

To obtain accurate historical data, use only the latest detailed statistical tables for FY 1999 and not data published earlier. Institutions revise prior-years' data when important changes occur in reporting practices and program classifications, and only the latest tables incorporate such changes.

UNIVERSITIES AND COLLEGES

R&D Expenditures

B-1. R&D expenditures at universities and colleges, by source of funds: fiscal years 1953-1999	33
B-2. R&D expenditures at universities and colleges, by character of work: fiscal years 1953-1999	34
B-2A. Federally financed R&D expenditures at universities and colleges, by character of work: fiscal years 1953-1999	35

R&D Expenditures, by Source of Funds
and Science & Engineering Field

B-3. R&D expenditures at universities and colleges, by source of funds and science and engineering field: fiscal years 1992-1999	36
B-4. Federally financed R&D expenditures at universities and colleges, by science and engineering field: fiscal years 1992-1999	37
B-5. Non-Federal R&D expenditures at universities and colleges, by source of funds and science and engineering field: fiscal years 1992-1999	38
B-6. R&D expenditures at doctorate-granting institutions, by source of funds and science and engineering field: fiscal years 1992-1999	39
B-7. Federally financed R&D expenditures at doctorate-granting institutions, by science and engineering field: fiscal years 1992-1999	40
B-8. Non-Federal R&D expenditures at doctorate-granting institutions, by source of funds and science and engineering field: fiscal years 1992-1999	41
B-9. R&D expenditures at public universities and colleges, by source of funds and science and engineering field: fiscal years 1992-1999	42
B-10. Federally financed R&D expenditures at public universities and colleges, by science and engineering field: fiscal years 1992-1999	43
B-11. Non-Federal R&D expenditures at public universities and colleges, by source of funds and science and engineering field: fiscal years 1992-1999	44
B-12. R&D expenditures at private universities and colleges, by source of funds and science and engineering field: fiscal years 1992-1999	45
B-13. Federally financed R&D expenditures at private universities and colleges, by science and engineering field: fiscal years 1992-1999	46
B-14. Non-Federal R&D expenditures at private universities and colleges, by source of funds and science and engineering field: fiscal years 1992-1999	47

<i>Tables</i>	<i>Page</i>
B-15. R&D expenditures at doctorate-granting institutions, by source of funds, science and engineering field, and control: fiscal years 1992, 1998, and 1999	48
B-16. Federally financed R&D expenditures at doctorate-granting institutions, by science and engineering field, and control: fiscal years 1992, 1998, and 1999	49
B-17. Non-Federal R&D expenditures at doctorate-granting institutions, by source of funds, science and engineering field, and control: fiscal years 1992, 1998, and 1999	50

R&D Expenditures at Historically Black Colleges and Universities, by Source of Funds and Science & Engineering Field

B-18. R&D expenditures at historically black colleges and universities, by source of funds and science and engineering field: fiscal years 1992-1999	51
B-19. Federally financed R&D expenditures at historically black colleges and universities, by science and engineering field: fiscal years 1992-1999	52
B-20. Non-Federal R&D expenditures at historically black colleges and universities, by source of funds and science and engineering field: fiscal years 1992-1999	53

Geographic Distribution of R&D Expenditures

B-21. R&D expenditures at universities and colleges, by geographic division and source of funds: fiscal year 1999	54
B-22. R&D expenditures at doctorate-granting institutions, by geographic division, state, and source of funds: fiscal year 1999	55
B-23. R&D expenditures at doctorate-granting institutions, by geographic division and state: fiscal years 1992-1999	57
B-24. Federally financed R&D expenditures at doctorate-granting institutions, by geographic division and state: fiscal years 1992-1999	59
B-25. State and local government-financed R&D expenditures at doctorate-granting institutions, by geographic division and state: fiscal years 1992-1999	61
B-26. Industry-financed R&D expenditures at doctorate-granting institutions, by geographic division and state: fiscal years 1992-1999	63
B-27. Institutionally financed R&D expenditures at doctorate-granting institutions, by geographic division and state: fiscal years 1992-1999	65
B-28. All other sources of financed R&D expenditures at doctorate-granting institutions, by geographic division and state: fiscal years 1992-1999	67
B-29. R&D expenditures at universities and colleges, by state, control, and source of funds: fiscal year 1999	69

<i>Tables</i>	<i>Page</i>
B-30. R&D expenditures at doctorate-granting institutions, by geographic division, state, and science and engineering field: fiscal year 1999	83
B-31. R&D expenditures at universities and colleges, by state, control, and science and engineering field: fiscal year 1999	85

R&D Expenditures, in Descending Order of Amounts, by Institution

B-32. Total R&D expenditures at universities and colleges: fiscal years 1992-1999	99
B-33. Federally financed R&D expenditures at universities and colleges: fiscal years 1992-1999	111
B-34. Non-Federal R&D expenditures at universities and colleges: fiscal years 1992-1999	123
B-35. R&D expenditures at universities and colleges, by source of funds: fiscal year 1999	128
B-36. R&D expenditures at public universities and colleges, by source of funds: fiscal year 1999	133
B-37. R&D expenditures at private universities and colleges, by source of funds: fiscal year 1999	137
B-38. Industry-sponsored R&D expenditures at universities and colleges: fiscal years 1992-1999	140
B-39. R&D expenditures at universities and colleges, by science and engineering field: fiscal year 1999	145
B-40. Federally financed R&D expenditures at universities and colleges, by science and engineering field: fiscal year 1999	150
B-41. Non-Federal R&D expenditures at universities and colleges, by science and engineering field: fiscal year 1999	155
B-42. R&D expenditures at public universities and colleges, by science and engineering field: fiscal year 1999	160
B-43. Federally financed R&D expenditures at public universities and colleges, by science and engineering field: fiscal year 1999	164
B-44. R&D expenditures at private universities and colleges, by science and engineering field: fiscal year 1999	167
B-45. Federally financed R&D expenditures at private universities and colleges, by science and engineering field: fiscal year 1999	170
B-46. Total and federally financed R&D expenditures at historically black colleges and universities: fiscal years 1996-1999	173

R&D Expenditures, by Science & Engineering Field and Selected Subfields, in Descending Order of Amounts, by Institution

B-47. Total and federally financed R&D expenditures in engineering at universities and colleges: fiscal years 1996–1999	175
B-48. R&D expenditures in engineering subfields at universities and colleges: fiscal year 1999	178
B-49. Federally financed R&D expenditures in engineering subfields at universities and colleges: fiscal year 1999	181
B-50. R&D expenditures in the physical sciences at universities and colleges: fiscal years 1996–1999 and by subfield for 1999	184
B-51. Federally financed R&D expenditures in the physical sciences at universities and colleges: fiscal years 1996–1999 and by subfield for 1999	187
B-52. Total and federally financed R&D expenditures in chemistry at universities and colleges: fiscal years 1996–1999	190
B-53. Total and federally financed R&D expenditures in physics at universities and colleges: fiscal years 1996–1999	193
B-54. R&D expenditures in the environmental sciences at universities and colleges: fiscal years 1996–1999 and by subfield for 1999	196
B-55. Federally financed R&D expenditures in the environmental sciences at universities and colleges: fiscal years 1996–1999 and by subfield for 1999	199
B-56. Total and federally financed R&D expenditures in the mathematical sciences at universities and colleges: fiscal years 1996–1999	202
B-57. Total and federally financed R&D expenditures in the computer sciences at universities and colleges: fiscal years 1996–1999	205
B-58. R&D expenditures in the life sciences at universities and colleges: fiscal years 1996–1999 and by subfield for 1999	208
B-59. Federally financed R&D expenditures in the life sciences at universities and colleges: fiscal years 1996–1999 and by subfield for 1999	212
B-60. Total and federally financed R&D expenditures in the agricultural sciences at universities and colleges: fiscal years 1996–1999	216
B-61. Total and federally financed R&D expenditures in the biological sciences at universities and colleges: fiscal years 1996–1999	219
B-62. Total and federally financed R&D expenditures in the medical sciences at universities and colleges: fiscal years 1996–1999	222
B-63. Total and federally financed R&D expenditures in psychology at universities and colleges: fiscal years 1996–1999	225

<i>Tables</i>	<i>Page</i>
B-64. R&D expenditures in the social sciences at universities and colleges: fiscal years 1996–1999 and by subfield for 1999	228
B-65. Federally financed R&D expenditures in the social sciences at universities and colleges: fiscal years 1996–1999 and by subfield for 1999	231

Current Fund Expenditures for Research Equipment, by Science & Engineering Field and Source of Funds

B-66. Current fund expenditures for research equipment at universities and colleges, by science and engineering field and source of funds: fiscal years 1992, 1998, and 1999	234
B-67. Current fund expenditures for research equipment at doctorate-granting institutions, by science and engineering field and source of funds: fiscal years 1992, 1998, and 1999	235
B-68. Current fund expenditures for research equipment at universities and colleges, by science and engineering field, source of funds, and type of control: fiscal year 1999	236
B-69. Total and federally financed current fund expenditures for research equipment at universities and colleges: fiscal years 1996–1999	237

UNIVERSITY-ADMINISTERED FEDERALLY FUNDED RESEARCH AND DEVELOPMENT CENTERS

R&D Expenditures at University-Administered Federally Funded Research and Development Centers

B-70. R&D expenditures at university-administered federally funded research and development centers, by character of work: fiscal years 1953–1999	240
B-71. R&D expenditures at university-administered federally funded research and development centers, by science and engineering field: fiscal years 1992–1999	241
B-72. Federally financed R&D expenditures at university-administered federally funded research and development centers, by science and engineering field: fiscal years 1992–1999	242
B-73. R&D expenditures at university-administered federally funded research and development centers, by science and engineering field: fiscal year 1999	243
B-74. Total and federally financed R&D expenditures at university-administered federally funded research and development centers: fiscal years 1996–1999	244

**Table B-1. R&D expenditures at universities and colleges,
by source of funds: fiscal years 1953-1999**

[Dollars in millions]

Fiscal year	Total	Source of funds				
		Federal Government	State and local government	Industry	Institutional funds	All other sources
1953	255	138	37	19	35	26

¹ Johns Hopkins University includes Applied Physics Laboratory.

NOTES: Because of rounding, detail may not add to totals.

Beginning in fiscal year 1999, this table reports data for all institutions. In prior years this table reported on doctorate-granting institutions only.

KEY: e = estimated
i = imputed

¹ Johns Hopkins University includes Applied Physics Laboratory, with \$436 million in total R&D expenditures.

² These data do not include R&D expenditures at university-administered federally funded research and development centers. See tables B-73 and B-74.

NOTE: Because of rounding, detail may not add to totals.

KEY: -- = not available
e = estimated
i = imputed

¹ Johns Hopkins University includes Applied Physics Laboratory, with \$419 million in federally financed R&D expenditures.

² These data do not include R&D expenditures at university-administered federally funded research and development centers. See tables B-73 and B-74.

NOTE: Because of rounding, detail may not add to totals.

KEY: -- = not available
e = estimated
i = imputed

NATIONAL SCIENCE FOUNDATION
4201 WILSON BOULEVARD
ARLINGTON, VIRGINIA 22230

Dear Colleague:

The National Science Foundation (NSF) and I would like to thank you in advance for your continued participation in its annual Survey of Research and Development Expenditures at Universities and Colleges (academic R&D expenditures survey). By contributing timely and accurate information to this fiscal year (FY) 1999 survey, you can ensure that your institution is represented in data used by members of Congress, Federal and state government planners, and officials in the academic sector to assess the adequacy of the nation's research base.

Coverage for the academic R&D expenditures survey includes U.S. institutions that currently have doctoral programs in science and engineering (S&E) fields with any amount of R&D expenditures, institutions that have the status of Historically Black College or University (HBCU) with any amount of R&D expenditures, or institutions that annually perform at least \$150,000 in separately budgeted research and development S&E activities. The reliability of the data and therefore the soundness of institutional, state, and national decisions based upon them are in large measure contingent upon receipt of complete and accurate data from all surveyed institutions. **The survey questionnaire is due January 24, 2000.**

This packet contains the following items:

1. Postcard to acknowledge that you have received this package
2. FY 1999 academic R&D expenditures survey questionnaire (NSF Form 411), with instructions, NSF/NCES Crosswalk, and **Web User ID and Password**
3. FY 1999 Optional Non-S&E Item 2A survey form
4. FY 1999 Optional Item 2B survey form
5. Proposed New Item for FY 2000
6. Facsimile showing data reported for your institution on the FY 1996-98 surveys
7. Informational brochure on the new Web Data Collection System
8. Question-and-Answer booklet
9. "FYT" flyer describing the NSF academic survey system
10. "Accessing NSF Data on the Internet"
11. Envelope for returning the completed survey questionnaire

Please let us know if your package is not complete!

POSTCARD

Please take a moment to let us know you have received this package by completing and mailing the enclosed postcard, giving the name and telephone number of the person responsible for completing the survey form.

FY 1999 SURVEY

There has been a **minor change** on the enclosed FY 1999 questionnaire from the survey form used for FY 1998. The FY 1999 questionnaire includes a check-off item on whether your institution includes the R&D expenditures performed at a **hospital**, and, if so, the hospital's name.

You will find an informational brochure about using the academic R&D expenditures survey Web data collection system in this packet. **Please note that your Web user ID and password are printed on the questionnaire label, which also contains your name and address.**

OPTIONAL ITEM 2A SURVEY FORM: FY 1999

To help NSF better understand how much **non-science and engineering R&D** is conducted at universities and colleges, please complete the Optional Item 2A and return it with the completed survey questionnaire. **Please note that you are encouraged to provide the Total and Total Federal non-S&E data if detailed field data are not available.** This format may become part of the survey questionnaire in FY 2000 but remains optional this year. All data reported by individual institutions on the optional item are **STRICTLY CONFIDENTIAL**. These data will not be published nor made available at the institutional level to the public.

OPTIONAL ITEM 2B SURVEY FORM: FY 1999

Please also take a moment to complete this item, which collects Federal R&D support statistics for major **individual Federal agencies**. This format may become part of the survey questionnaire in FY 2000 but remains optional this year. All data reported by individual institutions on the optional item are **STRICTLY CONFIDENTIAL**. These data will not be published nor made available at any level to the public; they will be used for internal analyses.

PROPOSED NEW ITEM FOR FY 2000

Please take a moment to review and comment on the new item that collects data on R&D expenditures your institution received as a **subrecipient**. Several university respondents recommended adding this question in addition to the current Item 1A.

WORLD WIDE WEB

An academic R&D expenditures survey home page is now available through the World Wide Web on the Internet. The page contains information about the survey and provides direct access to publications and data. To reach it, direct your browser to the following URL address: <http://www.nsf.gov/sbe/srs/rdexp/start.htm>. For more extensive S&E statistics, please try the Science Resources Studies home page: <http://www.nsf.gov/sbe/srs/stats.htm>. To submit your institution's data over the Web, the address for the Web data collection survey is <http://www.qrc.com/expweb>. **Please note that your Web user ID and password are printed on the questionnaire label, which also contains your name and address.**

FOR MORE INFORMATION

Please review the enclosed Question-and-Answer booklet, which contains useful information for completing the survey. If you have questions about the survey or would like information about our publications or data, please call Marge Machen of NSF at (703) 306-1772 or Hilary Jones of Quantum Research Corporation at (301) 657-3077, ext. 136.

If you prefer to submit your data electronically (in a layout similar to the questionnaire), please send email to Jennifer Greer at jgreer@qrc.com.

Thank you for your efforts in providing timely and meaningful statistics to NSF.

Sincerely,

John E. Jankowski, Jr., Director
Research and Development Statistics Program
Division of Science Resources Studies

Enclosures

NATIONAL SCIENCE FOUNDATION
ARLINGTON, VA 22230SURVEY OF RESEARCH AND DEVELOPMENT EXPENDITURES
AT UNIVERSITIES AND COLLEGES, FY 1999

Organizations are requested to complete and return this form to:

Quantum Research Corporation
7315 Wisconsin Avenue, Suite 400W
Bethesda, MD 20814-3202If you prefer, your response to the survey may be sent by email to:
jgreer@qrc.com

This form should be returned by January 24, 2000.

REMEMBER: Now you can submit your data on the Web at <http://www.qrc.com/expweb>. For more information, please see the informational brochure on the Web collection. Please note that your Web user ID and password are printed on the adjacent label, which also contains your name and address.

Your cooperation in returning the survey questionnaire promptly is very important.

This information is solicited under the authority of the National Science Foundation Act of 1950, as amended. Your response is entirely voluntary and your failure to provide some or all of the information will in no way adversely affect your institution.

All financial data requested on this form should be reported in thousands of dollars; for example, an expenditure of \$25,342 should be rounded to the nearest thousand dollars and reported as \$25.

Where exact data are not available, estimates are acceptable. Your estimates will be better than ours.

Include data for branches and all organizational units of your institution, such as medical schools and agricultural experiment stations. Data on research centers and facilities administered by your institution should be included. In addition, include hospitals or clinics owned, operated, or controlled by universities, and integrated operationally with the clinical programs of your medical schools.

NOTE: Academic institutions should exclude data for federally funded research and development centers (FFRDCs). Data for these facilities are collected separately.

Please correct if name or address has changed

If you have any questions please contact Marge Machen of NSF at (703) 306-1772, or Jennifer Greer of QRC at (301) 657-3077, ext. 132.

Financial data are requested for your institution's 1999 fiscal year.

Please circle the month in which your institution's fiscal year begins

1 2 3 4 5 6 7 8 9 10 11 12
JAN DEC

Do you include expenditure data for R&D performed at a hospital?

Yes ☐ No ☐

If so, please name the hospital. _____

It is estimated that response to this survey will require 13 hours. If you wish to comment on this burden, please contact Suzanne H. Plimpton of NSF at (703) 306-1125, ext. 2017, or email splimpto@nsf.gov.

How many person hours were required to complete this form? _____

Date submitted _____

Scope:This survey collects data on expenditures by universities and colleges for separately budgeted research and development (R&D) in science and engineering. Definitions used are compatible with OMB Circular A-21, revised April 26, 1996. Items 1 and 2 ask for *current fund expenditures* by source of funds and by field of science and engineering. Item 3 collects data on that *portion of current fund expenditures* reported in Items 1 and 2 that went for the purchase of scientific and engineering research equipment.**Definitions:****Research and Development (R&D).** R&D for purposes of this survey is the same as "organized research" as defined in Section B.1.b. of OMB Circular A-21 (revised). It includes all R&D activities of an institution that are *separately budgeted and accounted for*. R&D includes both "sponsored research" activities (sponsored by Federal and non-Federal agencies and organizations) and "university research" (separately budgeted under an internal application of institutional funds).**Research** is systematic study directed toward fuller knowledge or understanding of the subject studied. Research is classified as either basic or applied, according to the objectives of the investigator.**Development** is systematic use of the knowledge or understanding gained from research, directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes.**Current fund expenditures.** These are expenditures of funds available for current operations. Such expenditures include all unrestricted gifts and restricted current funds to the extent that such funds were expended for current operating purposes.**PERSON WHO SUBMITTED THIS FORM (PLEASE TYPE OR PRINT)**

Instructions for Items 1 and 2

Separately budgeted research and development (R&D) includes all funds expended for activities specifically organized to produce research outcomes and commissioned by an agency either external to the institution or separately budgeted by an organizational unit within the institution. *Include* research equipment purchased under research project awards from "current fund" accounts. Also *include* research funds for which an outside organization, educational or other, is a subrecipient. *Exclude* training grants, public service grants, demonstration projects, clinical trials, and departmental research expenditures that are not separately budgeted. Also, *exclude* any R&D expenditures in the fields of education, law, humanities, music, the arts, physical education, library science, as well as all other non-science fields. Allocate funding to the original sources whenever possible, as specified below. If this information is unknown, report the proximate funding source.

Total

- Federal Government.** Report awards for R&D (including direct and reimbursed indirect costs) by all agencies of the Federal Government.
- State and local governments.** Include funds for R&D (including direct and reimbursed indirect costs) from state, county, municipal, or other local governments and their agencies. Include here state funds that support R&D at agricultural and other experiment stations.
- Industry.** Include all awards for R&D (including direct and reimbursed indirect costs) from profit-making organizations, whether engaged in production, distribution, research, service, or other activities. Do not include awards from nonprofit foundations financed by industry; these should be reported under "All other sources" (line 1175).
- Institution funds.** Report funds, including related indirect costs, that your institution spent for R&D activities from the following unrestricted sources: general-purpose state or local government appropriations; general-purpose awards from industry, foundations, or other outside sources; tuition and fees; endowment income; gifts; and other institutional funds. In addition, estimate your institution's on-campus and off-campus unreimbursed indirect costs associated with externally funded R&D projects, including mandatory and voluntary cost sharing. To estimate unreimbursed indirect costs, preferably on a project-by-project basis, use your appropriate on-campus or off-campus *negotiated research indirect cost rate(s)* multiplied by the corresponding base(s) minus actual indirect cost recovery.
- All other sources.** Include awards for R&D (including direct and reimbursed indirect costs) from nonprofit foundations and voluntary health agencies as well as from all other sources not elsewhere classified. Funds from foundations that are affiliated with, or granted solely to your institution, should be included under line 1160, "Institution funds." Funds for R&D received from a health agency that is a unit of a state or local government should be reported under "State and local governments" (line 1125). Also include gifts from individuals that are restricted by the donor to research.

ITEM 1. CURRENT FUND EXPENDITURES FOR SEPARATELY BUDGETED RESEARCH AND DEVELOPMENT IN THE SCIENCES AND ENGINEERING, BY SOURCE OF FUNDS: FY 1999 (Include indirect costs)

Source of Funds	Line No.	(1) Total (Dollars in Thousands)	(2) Percentages of Total & Federal Funds That Are Basic Research
a. Federal Government	1110	\$	%
b. State and local governments	1125		BASIC RESEARCH Please provide the percentages of total and Federal expenditures that are basic research (not applied research) as defined in column (2). CONFIDENTIALITY Information received from individual institutions in lines 1161 and 1162, or estimates for basic research expenditures, will NOT be published or released; only aggregate totals will appear in tabulations.
c. Industry	1150		
d. Institution funds (sum of lines 1161 and 1162)	1160		
(1) Institutionally financed organized research	1161		
(2) Unreimbursed indirect costs and related sponsored research	1162		
e. All other sources	1175		
f. TOTAL (sum of a through e)	1100	\$	%

ITEM 1A. CURRENT FUND EXPENDITURES (TOTAL AND FEDERALLY FINANCED) FOR SEPARATELY BUDGETED RESEARCH AND DEVELOPMENT IN THE SCIENCES AND ENGINEERING PASSED THROUGH THE INSTITUTION TO SUBRECIPIENTS

How much of your total R&D (line 1100) and Federal R&D (line 1110) expenditures was passed through by your institution to subrecipients?

Subrecipients	Line No.	Dollars in Thousands	
		(1) Total	(2) Federal
Educational subrecipients	1910		
Other subrecipients	1920		
Total	1900		

For Federal awards, **subrecipient** means the entity that expends Federal awards received from a pass-through entity to carry out a Federal program, but does not include an individual that is a beneficiary of such a program. A subrecipient may also be a recipient of other Federal awards directly from a Federal awarding agency. —OMB Circular A-133, Section .105 (revised April 22, 1996) For awards from non-Federal sources, the subrecipient definition is analogous to the Federal one.

Educational [subrecipients] refers to all academic colleges and universities and all units owned, operated, and controlled by such institutions.

**ITEM 2. CURRENT FUND EXPENDITURES
(TOTAL AND FEDERALLY FINANCED)
FOR SEPARATELY BUDGETED RESEARCH AND DEVELOPMENT,
BY FIELD OF SCIENCE AND ENGINEERING: FY 1999
(Include indirect costs)**

Please note that total R&D expenditures in line 1400, column (1) should be the same as reported in Item 1, line 1100, column 1.

Federally financed R&D expenditures in line 1400, column (2) should be the same as reported in Item 1, line 1110, column 1.

Field of science & engineering	Line No.	(Dollars in thousands)	
		(1) Total	(2) Federal

j. TOTAL (sum of a through i)	1400	\$	\$

Please EXCLUDE from your response any R&D expenditures in the fields of education, law, humanities, music, the arts, physical education, library science, and all other non-science and engineering fields.

**ITEM 3. CURRENT FUND EXPENDITURES FOR RESEARCH EQUIPMENT (TOTAL AND FEDERALLY FINANCED)
FOR SEPARATELY BUDGETED RESEARCH AND DEVELOPMENT,
BY FIELD OF SCIENCE AND ENGINEERING: FY 1999**

Please report that portion of current fund expenditures reported in items 1 and 2 that went for the purchase of research equipment. This includes all research equipment purchased under sponsored research project awards from current fund accounts.

For column (1), report current fund expenditures for R&D from all sources: Federal Government, state, county, municipal or other governments and their agencies (including state funds supporting R&D at agricultural experiment stations); industry; institution funds; and private foundations and voluntary health agencies, individuals, and associations.

For column (2), include funds from awards for R&D sponsored by agencies of the Federal Government.

PROPOSED NEW ITEM FOR FY 2000

NSF would like to include the following item in the FY 2000 survey. This item will be in addition to the current Item 1A. Please review the proposed item and provide your comments and suggestions in the space below.

CURRENT FUND EXPENDITURES (TOTAL AND FEDERALLY FINANCED) FOR SEPARATELY BUDGETED R&D IN THE SCIENCES AND ENGINEERING RECEIVED AS A SUBRECIPIENT

How much of your total R&D (line 1100) and Federal R&D (line 1110) expenditures did your institution receive as a subrecipient?

Pass-through entity providing the funds	Line No.	Dollars in Thousands	
		(1) Total	(2) Federal
Educational	2010		
Other	2020		
Total	2000		

COMMENTS/SUGGESTIONS:

BASIC RESEARCH

How should basic research be calculated?

The percentage of basic research should be defined at the individual grant level by each principal researcher. Where this is not possible, grants should be reviewed by each department head or other relevant research coordinator.

Here is another method used by one institution to estimate the amounts of basic and applied research: All federally funded grants and R&D funded from other universities, foundations, and nonprofit organizations are considered to be basic research. R&D funds received through Federal cooperative agreements and Federal contracts, all state-funded R&D (except that from the state's Advanced Research Program), and R&D funds received from private for-profit institutions are considered to be applied research.

DATA USES AND AVAILABILITY

How are these data typically used?

Congress and Federal and state government planners use the data for science policy analysis, national and international studies, legislative hearing reports, budget formulation sessions, and other measurements of the adequacy of the nation's research base. Academic institutions use the information for policy analysis, publicity, and other purposes. Industrial firms often request data to prepare for on-campus recruiting. The data often appear in higher education studies and publications.

How are the data made available?

NSF's annual *Academic Research and Development Expenditures Survey* compiles detailed data in a comprehensive document, available on request. Institutional profiles show trend data for responses at the institutional level from all academic S&E surveys.

Survey data are now available through the World Wide Web on the Internet. To obtain the most recent survey publications and data tables, data files, institutional profiles, and access to WebCASPAR, the Web-based Computer-Aided Science Policy Analysis and Research database system, direct your browser to <http://www.nsf.gov/sbe/srs/stats.htm>.

For more information, contact Marge Machen at (703) 306-1772 (email: mmachen@nsf.gov).

Questions and Answers

This booklet answers common questions about the academic R&D expenditures survey.

FIELD OF SCIENCE CLASSIFICATIONS

How should I assign field classifications for research and development (R&D) performed in interdisciplinary centers?

Interdisciplinary research should be categorized by individual research project according to the nature of the research performed. When individual projects encompass multiple fields of science and engineering (S&E), prorate expenditures to report the proportions of each discipline involved. Do not lump funds together into "other" field categories unless the type of research is actually defined as "other." NSF recommends crediting such research to the appropriate S&E discipline when the project first begins.

How should I allocate research dollars spent for computing or supercomputing services?

Report research dollars spent for computer usage to the individual fields of science and engineering for which the R&D is performed. Do not report these funds in computer science, unless computer science research was performed.

What fields should be excluded?

Exclude fields that are considered to be non-science—education, law, humanities, business, music, the arts, library science, and physical education. Note that you would report separately budgeted R&D for the philosophy of science (a science category), but not philosophy (one of the humanities). The NSF/NCES Crosswalk included with the questionnaire lists all S&E fields.

SOURCES OF FUNDING

Should faculty practice plan income be included in the survey?

Expenditures for faculty practice plans are not considered research and should not be included. If income from such plans is used to fund other research and the funds are separately budgeted, then the expenditures should be included in institutional funds.

How much of our administrative costs can be reported in the survey?

Administrative salaries and other administrative costs, particularly at your organized research units, can be reported only if funded through projects specifically restricted and budgeted for research. General administrative costs should not be reported.

How should I report institutional funds?

All research dollars reported for your institution should be funds that are separately budgeted and restricted for research, such as sponsored research accounts or general accounts that are specifically budgeted for research. Do not include funds not specifically budgeted for research.

If your institution does not track underrecovery of indirect costs, use the underrecovery formula included in the questionnaire instructions. Do not forget to include and distribute unreimbursed indirect costs by detailed field in survey Item 2.

Be sure to report all indirect costs related to your institutional funds.

Can I report donated research equipment in the survey?

Since donated research equipment is not typically captured in university accounting systems, the value of donated research equipment should not be reported.

COLLABORATIVE RESEARCH ARRANGEMENTS

Should I report expenditures received through collaborative research ventures with other institutions?

Report only what your institution actually expends and accounts for when participating in joint research ventures.

How do I distinguish between being a subrecipient of pass-through funds and being a subcontractor of R&D services?

A subrecipient is an entity that receives Federal financial assistance from the state or any other entity to administer a program (OMB Circular A-110). The subrecipient actually administers or controls the program, as opposed to the subcontractor who contracts for a specific service on a per-unit basis. A key factor in determining if a subrecipient arrangement exists is determining if the entity assumes the responsibility to administer the program. Subrecipients tend to be the co-authors of publications, writers of technical reports discussing findings, inventors, etc. Unlike a subrecipient relationship, a subcontract is a procurement of goods and/or services. Payments to subcontractors are expenditures for services, not expenditures for research, and are different from pass-through funds to subrecipients.

ORGANIZATIONAL UNITS

Which organizational units should I include in the survey?

Include research conducted through units that are considered part of your institution's organizational structure. For example, report expenditures from branch campuses, medical schools, agricultural stations, research centers and institutes, and any other units whose expenditures are separately budgeted **and are accounted for by your institution's financial system**. Exclude R&D expenditures performed by federally funded research and development centers (FFRDCs), nonprofit institutions, and private laboratories. Do not report salaries of faculty doing research at outside institutions unless your institution accounts for the funding of that research.

Academic R&D Expenditures

OnTheWeb!

Security: Your data are password-protected to ensure confidentiality.

- Data reporting is easier—enter your data directly onto your computer screen.
- Help and instructions are readily available to you on each Web survey page.
- Data errors are reported to you instantly.

Everything's done on your computer screen. Totals are computed for you. Flags indicate when your survey is ready to submit to NSF.

How It Works

On your computer, open your Web browser (such as Netscape Navigator or Microsoft Internet Explorer) and visit <http://www.qrc.com/expweb>

Log in by entering the Institution ID and password you received from NSF. (If you forget them, e-mail us at expweb@qrc.com).

Then you can ...

- update your contact information and
- enter survey data.

You Can Also

- print the finished survey on paper for your records,
- work offline using spreadsheets and data files, and
- get personalized help on your computer screen.

For Further Information

If you have any questions about this Web survey, please contact Jennifer Greer or Hilary Jones by telephone at (301) 657-3070 or by email at expweb@qrc.com.

For any other survey data questions, please contact Marge Machen of NSF at (703) 306-1772 or by email at mmachen@nsf.gov.

More Features:

- You can review and revise your data at any time.
- The data are reviewed for errors every time you click on "Save."
- Data are saved to a central database, accessible to you at your convenience.
- After you complete all survey questions, make the data available to NSF by the simple click of a button.

BEST COPY AVAILABLE

The National Science Foundation promotes and advances scientific progress in the United States by competitively awarding grants for research and education in the sciences, mathematics and engineering.

To get the latest information about program deadlines, to download copies of NSF publications, and to access abstracts of awards, visit the NSF Web site at:

The Foundation provides awards for research and education in the sciences and engineering. The awardee is wholly responsible for the conduct of such research and preparation of the results for publication. The Foundation, therefore, does not assume responsibility for the research findings or their interpretation.

The Foundation welcomes proposals from all qualified scientists and engineers and strongly encourages women, minorities, and persons with disabilities to compete fully in any of the research and education related programs described here. In accordance with Federal statutes, regulations, and NSF policies, no person on grounds of race, color, age, sex, national origin, or disability shall be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program or activity receiving financial assistance from the National Science Foundation.

Facilitation Awards for Scientists and Engineers with Disabilities (FASSED) provide funding for special assistance or equipment to enable persons with disabilities (investigators and other staff, including student research assistants) to work on NSF projects. See the program announcement or contact the program coordinator at 703-292-8636.

The National Science Foundation has TDD (Telephonic Device for the Deaf) capability, which enables individuals with hearing impairment to communicate with the Foundation about NSF programs, employment, or general information. To access NSF TDD dial 703-292-5090; for FIRS, 1-800-877-8339.
